

How would you rate the FLOW OF TRAFFIC, the spacing of the room?

21 responses

It has good space L❤️VE it there aren't many desks But that is what makes it amazing. A+

It's big but some spots are a little crowded like in between the tables and cabinets.

It's was a good flow of traffic but maybe more space between coat racks and at the back.

Because they tried moving the tables.

Because everything was spread apart

I just think we should have the tables sped out more

Because it's hard to move chairs around

Because it is enough for 3 or 2 people to go at once, it's not that squishy for people to go for recess.

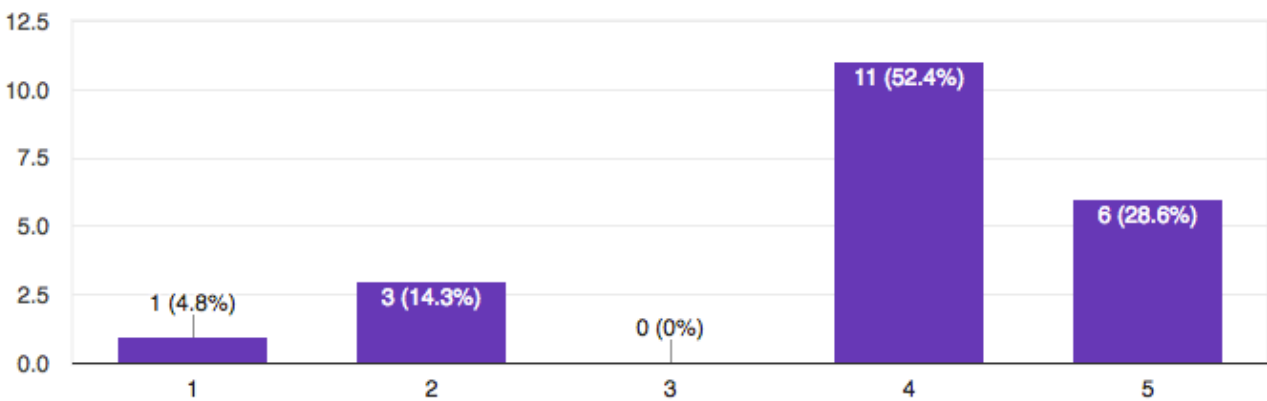

The flow of traffic is really good there is a lot of space and when you need to grab some thing there is not like chairs ever where

It gets pretty crowded in the morning and end of the day near the rectangle table.
And it's hard to get int the tall tables in the back

When the chairs are in the middle in class it's kind of crowded.

How would you rate the PURPOSE of the placement of furniture? Are there good reasons for the layout of the room?

21 responses

It is very organized and spacious

I like how the classroom looks.

It's was good placing but maybe can do better like more places to sit like red chair and other stuff.

The tables are spaced so you have more space

Because everything was spread apart

The placing doesn't make sance

I like the placing of the furniture, like: the quiet/cozy corner

I is good and it kinda looks like ms speers room when I was in grade 3, and I like it and how it looks.

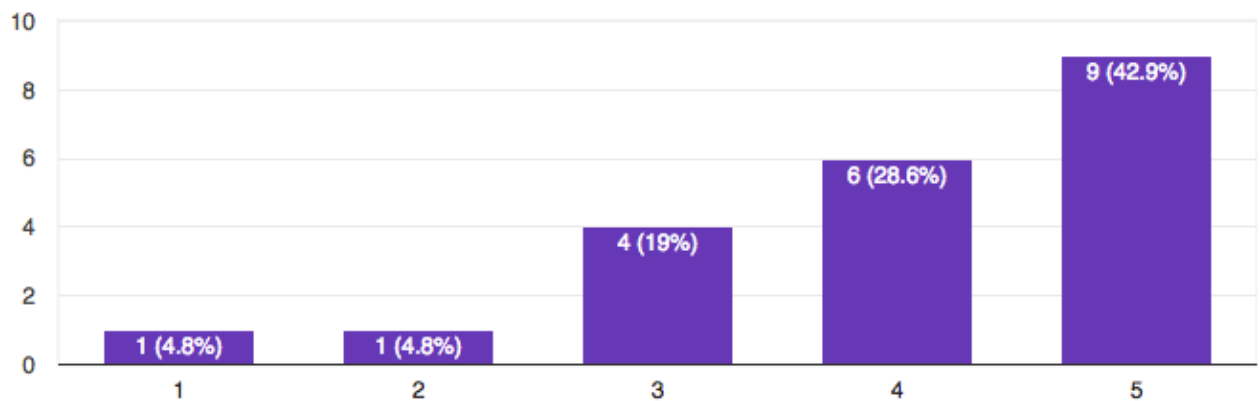

I thing that the place ment is good but the tables at the back are to close to each other

The tables were pretty far apart so you couldn't talk

Because it's comfortable

How would you rate the space for a BALANCE of group work, alone work and more variety for different learners?

21 responses

Because there was no assigned seating

There was space a lot of options if you wanted to work alone, in partners, or groups.

2 stars cuz there were a lot of tables for people but it was so crowded

There's lots of places to work so you're alone

I didn't hear a lot of kids talk at work time

There's not a lot of people at one table and there's enough space including the hallway for working alone.

Some people talk but I still like how the room is set up

You can talk too much

Good

They did work together which is very good because you were supposed to work as a team!

Some desks are far apart and don't have many chairs at one desk

I think we did well for group work and people who like to work alone.
