

# How would you rate the FLOW OF TRAFFIC, the spacing of the room?

25 responses

Because the desk are evenly spaced and in perfect spots so it is not really crowded (2)

It's okay to move around depending on where you are.

The hexagons are really spaced out and and the carpet as well

It's VERY spaced out and easy to get through to the other side of the room

There's a lot of space between the desks and the middle has lots of space for chairs.

All the desk are really spread out so we have lots of walking room.

They actually took out some shelves and it looks like a lot of space. You almost could even play tag in the room with 25 people.

Because it is so spaced out so we can get a around are class 5T

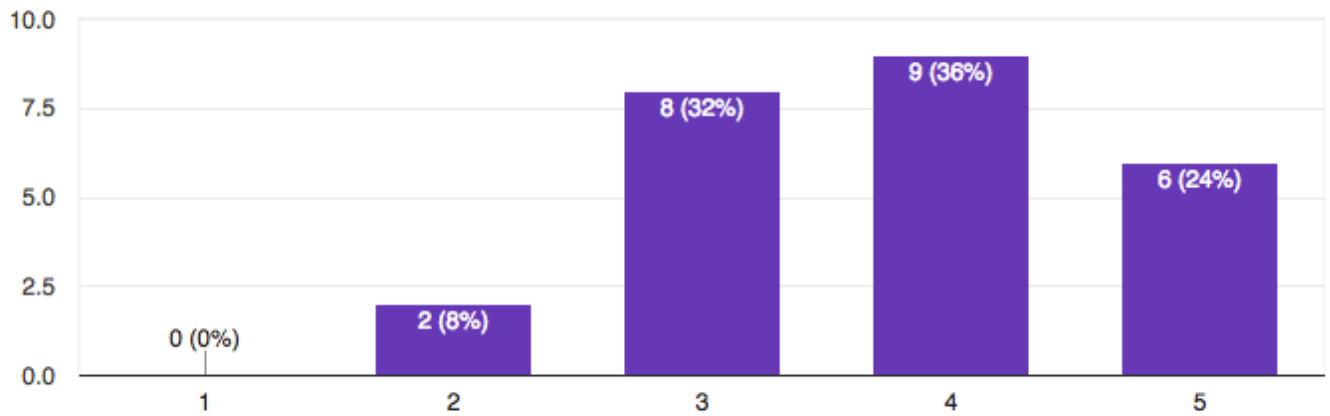

I thought the the class was really roomy and you could move around.

It is so easy to get around and easy to find my stuff

There is lotta space in between desks and chairs.

# How would you rate the PURPOSE of the placement of furniture? Are there good reasons for the layout of the room?

25 responses

It's good furniture but the red chair should stay where it is and don't be at desks because it takes up to much spaces.

I love the The organization but the thing that I would move is the circle table on top of the carpet. Because we do a lot of work around the carpet and I would like it to have more options to sit .

Every things OK buut it's kinda pointless to have a table ON THE CARPET 🇨🇦

I don't like how the circle desk is in the middle of the carpet and there's not much room on the carpet and it can be dangerous because if somebody put the chair on someone's finger it will get hurt

I did not like how there is a tables just like in the middle of the room I like how the to high tables are together

There is not good furniture

Seemed better

I mostly like how creative they did at the mat because I was surprise that a desk is on the mat and the log and be seats.

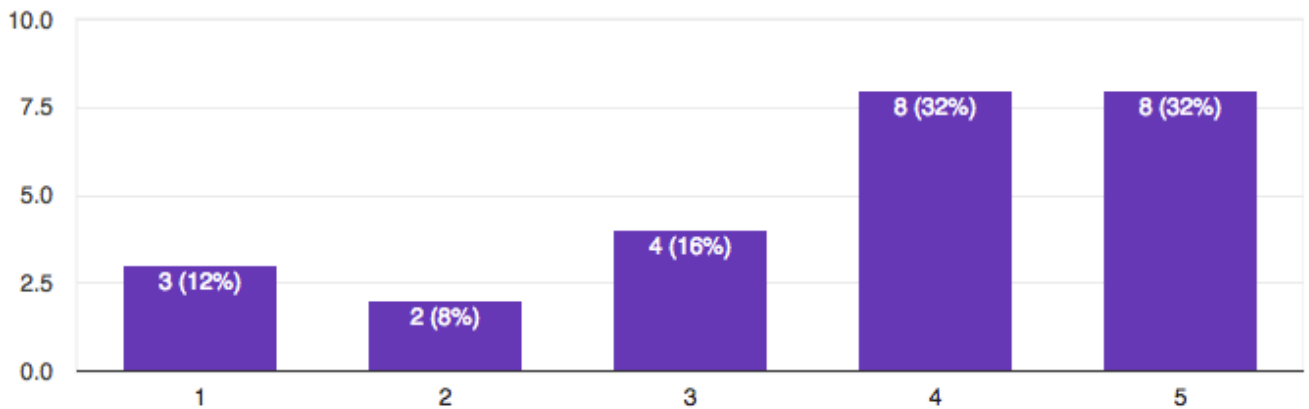

There's not to many desks but everyone can sit

I think it was a good layout because lots of space all over the room

# How would you rate the space for a BALANCE of group work, alone work and more variety for different learners?

25 responses

It's so perfect 🤞 might be my second best

I heard and saw how quiet it is when we are working and stuff but it felt the same people like the boys would always sit in the same place.

I love how we have the pillows now . The big red chair is really comfy to sit in while you're doing work and we have some space so people can lay in the floor and do work .And you could also be at a desk by yourself or with the group .

The Boys 😬 Always talk and one table has alllooooot Of places to sit and they always sit there and talk

There is 3 tables to work alone if you want quite there is 2 tables for 2 people per table there is also 3 tables if you want to sit in big groups

I like how they put the hex tables together because then friends can work together and I all so that the tow high tables are together

It is vary good

I worked harder at table

Because when I sat at the rectangle table I got use to working and it was easy with some spaces.
